Andrei Endelman

Miami, FL Andreiendelman@hotmail.com (305) 318-2119 Andrei-Endelman.vercel.app

I am a Computer Science student at Florida International University with a strong foundation in full-stack development and software engineering. Experienced with the MEAN stack and passionate about building scalable web applications and exploring AI-driven solutions.

SKILLS

Languages: Java, JavaScript, HTML, CSS
Frameworks/Libraries: Angular, Node.js, Express, MongoDB, Bootstrap, Angular Material
Tools & Platforms: Git, Postman, Vercel, Render, IntelliJ, VS Code

EDUCATION

Florida International University – Miami, FL
Bachelor of Science in Computer Science, Expected: December 2026
Bachelor of Arts in English, December 2019
Relevant Coursework: Data Structures, Computer Architecture, Software Engineering

PROJECTS

Duel-Meet (Full-Stack TCG Meetup Platform mobile app built on Angular/Ionic)
[http://duel-meet.vercel.app] [http://github.com/andreiendelman/duelmeet]

- Developed a social meetup platform for trading card game players to find, host, and join local in-person games, solving the common problem of attending game stores alone.
- Implemented location-based game discovery using MongoDB geospatial queries, real-time messaging via RxJS polling, and a cascade account deletion system to maintain data integrity.
- Built friend and reputation systems, email-gated features, and game-specific chat lobbies, integrating Google Places API for location search and Resend/Nodemailer for transactional emails.
- Deployed as a Progressive Web App with Capacitor-ready mobile builds for iOS/Android; backend hosted on Railway.

Task Manager Website (Full-Stack)
[https://angular-task-app-seven.vercel.app]

- Built a full-stack task manager web app using the MEAN stack (MongoDB, Express.js, Angular, Node.js), featuring a secure login system, user authentication, AuthGuards, and dynamic task cards.
- Deployed frontend on Vercel and backend on Render, utilizing MongoDB Atlas for cloud-based data storage.
- Implemented a responsive UI with Angular Material, featuring a modern dashboard layout, hover interactions, and mobile-friendly design.

EXPERIENCE

Full-stack Engineer Intern, *Tekin Software,* Remote/Hybrid May 2025 – July 2025

- Developed and deployed a task manager web app using the MEAN stack; handled all aspects of architecture, UI, API integration, and deployment.
- Documented development and maintained clean GitHub repo; contributed to additional UI/UX design projects across the company

Captain, *Contessa,* Miami, FL February 2023 – June 2025

- Led front-of-house operations during high-volume services, coordinating a team of servers and support staff to ensure smooth and efficient guest experiences.
- Maintained seamless service standards while managing floor plans, table assignments, and real-time guest flow using OpenTable.

Captain, *Villa Azur Restaurant,* Miami Beach, FL September 2019 – January 2023

- Delivered exceptional guest service in a fine dining environment, ensuring personalized experiences and maintaining high standards of professionalism and attention to detail.
- Collaborated and made lasting relationships with various liquor companies to host branded events (Bacardi, Moet & Hennesy), and drive product specific sales.
